

# Welcome to the Asavanant Continuing Education Center

Welcome to the exciting world of Computerized Dentistry with CEREC 3D!

CEREC is one of the most advanced products in world dentistry with over 6 million restorations worldwide. This unique treatment allows dentists to design, mill and place high quality, tooth-like restorations in one patient visit, without the need for conventional impressions and temporization.

## Objective

Training for the CEREC method is essential to your success with this incredible technology. Proper instruction is your key to understanding the nuances of the CEREC 3D device and will bring you and your patients great rewards. The incorporation of any new technology brings with it a "learning curve" and it is the objective of the courses to help you achieve a firm foundation. All courses are recognized by International Society of Computerized Dentistry (ISCD)

## Basic Cerec 3D Training Course

This basic training course is for dentists who are beginners for the Cerec 3D technology. The course will cover all the basic principles for Ceramic inlay-onlay and the introduction to veneer and crown software.
